**Versatile** - several modes of operation allow for batch production or in-line, on demand use

**Flexible** - adaptable and adjustable for seamless integration into any packing environment

**Excellent Shock Absorption** - 2- or 3-ply pads provide excellent cushioning

**Environmentally Friendly** - 100% biodegradable, recyclable and renewable paper

---

**PadPak AutoPad Senior**

*powerful in protection, versatile in application*

---

**Excellent Cushioning Performance**

**Created by a Multi-ply Paper Pad**

The PadPak AutoPad Senior is an extremely versatile 2- or 3-ply paper packaging system that can accommodate all in-the-box packaging needs and applications from cushioning to wrapping, and blocking and bracing.

The PadPak system converts multi-ply kraft paper into cushioning pads to protect your products. Inside the converter, the paper layers are crimped together, trapping air inside the layers to form a cushioning pad. The pads can be produced on demand or by batch production. Extremely versatile, the converter is height adjustable, rotates and can be used in a vertical or horizontal position.
